DRS-M 210 SOLUTION

DRS M210 V2 is designed for the DJI Matrice 210 V2 series. It is installed on top of the main frame and connected via the drone's built-in SDK. Our fault detection algorithms have been optimized for the M210 V2, based on the large amounts of flight data we have collected from test and cooperating customers. DRS M210 V2 is an ultra-lightweight parachute solution, designed to minimally impact the limited payload capacity of the M210 V2, while providing maximum flight safety

SPECIFICATIONS DRS M 210

Weight range
DJI Matrice 210 V2

System weight
~ 400 g

Height/Diameter
130 mm / 75 mm

Parachute Deployment
within 20–30 m

Interface
O-SDK

Optional
Geofencing, IP-Protection, RC Trigger

Descent velocity
2–4 m/s

Impact energy
6–80 J

GRIDX
metering and control
