

DRS 25 SOLUTION

DRS 25 is designed for drones with a maximum take-off weight between 15 and 25 kg. It is available with different interfaces to connect with your type of drones. Its lightweight design and easy maintenance make it an ideal solution for professional drone operators who want to spend a lot of time in the air. The parachute system reduces the risk of injury and serious injury to people in the event of a drone malfunction. At the same time, it safely returns your expensive equipment to the ground. **DRS** closes a critical security gap to enable commercial drone operations that require the highest levels of protection for all involved.

SPECIFICATIONS DRS 25

Weight range
15–25 kg MTOW

System weight
~ 600 g

Height/Diameter
250 mm / 75 mm

Parachute deployment
within 30 m

Interface
MAVLink (Auterion), DJI-API,
Customer Serial Interface, PWM,
Custom Solution

Optional
Geofencing, IP-Protection, RC Trigger
Descent velocity
2–3.60 m/s

Impact energy
30–162 J

GRIDX
metering and control
