

DRS 15 SOLUTION

DRS 15 is designed for drones with a maximum take-off weight between 10 and 15 kg. It is available with different interfaces to connect with your type of drones. Its lightweight design and easy maintenance make it an ideal solution for professional drone operators who want to spend a lot of time in the air. The parachute system reduces the risk of damage and serious injury to people in the event of a drone malfunction. At the same time, it safely returns your expensive equipment to the ground. **DRS** closes a critical security gap to enable commercial drone operations that require the highest levels of protection for all involved.

SPECIFICATIONS DRS 15

Weight range
10–15 kg MTOW

System weight
~ 400 g

Height/Diameter
165 mm / 75 mm

Parachute Deployment
within 20–30 m

Interface
MAVLink (Auterion), DJI-API,
Customer Serial Interface, PWM,
Custom Solution

Optional
Geofencing, IP-Protection, RC Trigger

Descent velocity
3–4 m/s

Impact energy
30.15–120 J

GRIDX
metering and control
