

BS30 INTELLIGENT BATTERY STATION

SPECIFICATIONS

Dimension:

353x267x148mm.

Net Weight:

3.95Kg.

Compatible Battery:

TB30 & WB37

Input:

100-240 VAC, 50/60 Hz.

Output:

TB30 Battery Port: 2.6 V, 8.9 A (Supported up to 2 outputs simultaneously)

Output Power:

525W

Ingress Protection Rating:

IP55 (with the cover closed properly)

BS30 Intelligent Battery Station is an advanced charging solution for professional drone operators. With its modern and compact design, it allows simultaneous charging of up to 8 Matrice 30 Series intelligent batteries.

The station has advanced charging algorithms that optimize battery performance and extend their lifespan. Equipped with a built-in cooling system, it ensures safe and efficient charging even in demanding environments. The intuitive LCD display provides real-time battery information, allowing users to easily monitor charging progress.
