

X - PORT

IN THE BOX

- DJI X-Port × 1
- Protective Cover × 1
- Primary Arm Mounting Screw × 5
- Secondary Arm Mounting Screw × 1
- Secondary Arm Sleeve × 1
- Secondary Arm Plug × 1

OVERVIEW

DJI X-Port is a high-precision 3-axis gimbal, it enables developers to create third-party payloads that best match DJI flight platforms using DJI's pioneering gimbal technology.

HIGHLIGHTS

- High-precision 3-axis gimbal
- Integrates all functions of PSDK 2.0
- Customizable gimbal parameters
- Supports Mounting in the Upward-facing Gimbal Slot
- Customizable channels for remote controller buttons
- Can be controlled directly through DJI Pilot app, MSDK and OSDK

TIPS

1. The dimension and structure design of the payloads must meet the requirements in the user manual.
2. In the development stage, you need to use [Payload SDK Development Kit 2.0](#) with X-Port together.

COMPATIBILITY

- Matrice 350 RTK
- Matrice 200 Series V2
- M300 RTK
