

ELECTRONIC LAUNCHER ES SERIES

ES638

ES838

ES264

TECHNICAL PARAMETERS

Model

ES638/ES838/ES264

Dimensions

140*160*180mm/172*160*180mm/140*160*226mm

Weight

Product 1109±10g/1150g when empty

Cartridge capacity

6/8/2 rounds

Supported ammunition

38mm electrify trigger ammunition

Firing method

Electrify triggering

Supported models

DJI matrix M300/350 RTK Series

Mounting options

Quick mount and release

Load interface

DJI SkyPort V2.0

Power rating

25W

Control method

DJI M300/350 RTK Remote Control + czi assistant app

Control link

DJI Drone Link

Control distance

Consistent with DJI M300/350 RTK control distance

GRIDX
metering and control

ELECTRONIC LAUNCHER

ES SERIES

ES series launcher is intended exclusively for drones, based on the DJI PSDK and adapted to the DJI M300/M350 flight platform. Unique bracket with quick release and locking mechanism makes disassembly and assembly easy. The multiple vibration and shock resistant design is stable and reliable.

The launcher can be quickly replaced according to the actual mission, so that it can fire continuously and reload quickly, using a unique launch controller, real-time video feedback via PSDK link, link control via PSDK, hover window operation, without the need for additional third-party remote control hardware, one operator can complete the task.
